Daniel Bringel Gusmão

Senior Backend Software Engineer .NET C# Specialist | API | APIM
| APIC | Rest | Curl | Microservices | CI/CD | SQL Server | Oracle |
PostgreSQL | MySql | JavaScript
Greater Goiania

Summary

I'm a Senior Backend Engineer specialized in C#/.NET with 10+ years of experience building scalable APIs, automation systems, and cloud-based solutions. My career was developed in the Information Technology field, with broad experience across web systems, intranets, and backend platforms.

Over the years, I've worked on high-stakes projects such as a government public tender platform managing an annual budget of 10 million reais, and a complete e-commerce solution integrated with Cielo.

My expertise includes C#/.NET, SQL (schema design, tuning, ANSI SQL), MVC, OOP, Azure services, microservices, and Scrum. While my focus is backend development, my background also gave me familiarity with frontend, hosting, and visual design.

What drives me is solving real problems with clean code, automation, and scalable architectures — always open to new practices, methodologies, and tools.

Currently open to remote opportunities worldwide as a Senior Backend .NET Engineer.

Experience

Accelera Technologies

Senior Full Stack Software Engineer .NET C#

October 2022 - Present (3 years)

São Paulo, Brasil

- Development of applications for energy companies on integrations with APIC and APIM.

- All of our pull requests are made through GitHub and are analyzed by SonarQube, ensuring CI/CD quality.
- I contributed to the construction of an energy-saving simulator.
- I work with agile methodology using Jira as my main tool.

LG lugar de gente

Senior Full stack Software Engineer C# .Net

March 2019 - July 2022 (3 years 5 months)

Goiânia Area, Brazil

- I worked in a software factory developing the Recruitment and Selection module of Suite Gente (The Company's ERP).
- The ERP above operates with a multi-tenant structure, where each client connects to the application through their own tenant.
- I built APIs and microservices.
- I worked with Tortoise SVN for version control.
- Unit testing with xUnit.

Conveste Serviços Financeiros

Senior Software Engineer C# .Net

April 2017 - December 2017 (9 months)

Goiânia, Goiás

- Created a systems and services platform that balances the interests of real estate agencies and those of the capital markets.
- Built a web-based platform for consolidating customer data (BI - Business Intelligence) using MVC, Web Forms, DevExpress, SQL Server, JQuery, and JavaScript.

Indra

Full Stack Software Engineer

October 2011 - March 2016 (4 years 6 months)

- I participated in more than 30 government websites and web systems of the State of Goiás.
- Developed new system features and updates to existing routines, evaluating their performance.
- Used Agile project methodology (Scrum).
- Achieved an advanced level in the PHP CodeIgniter framework.
- REST and SOAP APIs.

2Fly Agência Digital

Full Stack Software Engineer

February 2007 - January 2011 (4 years)

Goiânia, Goiás, Brasil

- I worked on several institutional sites and web systems using technologies such as PHP, Ajax, JavaScript, CSS, and HTML.

Sétima do Brasil

Web Designer

November 2004 - March 2005 (5 months)

Goiânia, Goiás, Brasil

- Solutions for industry and retail, aiming to reduce logistics costs.
- Working with templates on Xoops portal system (similar to Joomla). Flash animations, presentations, and digital visual arts.
